

FIRST AID KIT ITEM LIST ILLUSTRATED

The contents of a first aid kit vary based on the environment and the types of injuries that occur in each workplace. OSHA enforces the recommended ANSI guidelines for first aid kits to ensure that employees have access to basic first aid supplies to treat the most common injuries. Creating a list of the first aid products you need to keep in your kit should include all of the following items.

Instant Cold Pack

Provides cold therapy for sprains and muscular injuries

Gauze Pads

Sterile wound care dressing for minor cuts and scrapes

First Aid Burn Cream

Cream treatment for burns, reduces pain and starts healing

Gauze Bandage

Gauze roll bandage for dressing minor wounds and burns

Scissors

Used for cutting gauze

Combine Pad

Sterile, gel soaked burn dressing for minor skin burns

Elastic Bandage Roll

Cohesive bandage roll for supporting injuries and adhering first aid dressings

Hand Sanitizer

Antibacterial, alcohol hand sanitizer packets for hand hygiene in the workplace

Antiseptic Towelette

For cleaning and disinfecting cuts and scrapes. It also helps to prevent infections in wounds

Neomycin Antibiotic
