

5 WAYS TO USE A HYGIENE KIT

TRAVEL

Take toiletries on the go

Travel size toiletries like shampoo, soap, toothpaste and toothbrushes are all considered essential bathroom items. These necessities keep us fresh and clean. A travel hygiene kit is ideal while away from home.

HOMELESS

Give hygiene kits to the needy

Hygiene kits for homeless people offer dignity and personal hygiene aid for the less fortunate. Consider donating hygiene items to homeless shelters and giving homeless hygiene kits to the less fortunate.

PERSONAL

Personal toiletries

Small personal size hygiene supplies like soap, mouthwash, single use lotions, shampoo, toothpaste and a toothbrush are a few of the essential items used in a personal hygiene kit.

EMERGENCY/DISASTER

Prepare for the unexpected

Emergencies or natural disasters are never planned but we can be prepared. Essential hygiene supplies don't take up much room so be prepared and include basic toiletries in your bug out prepper go bag.

RECREATION

Stay fresh while being active

Why bring the entire bathroom closet while working out at the gym or being active outdoors. Small "hotel size" bathroom items like soap, shampoo, deodorant, feminine hygiene products and shaving supplies are ideal items for any active recreational hygiene kits.
